

Making a Paper Lantern

Step 1: Fold one piece of paper in half.

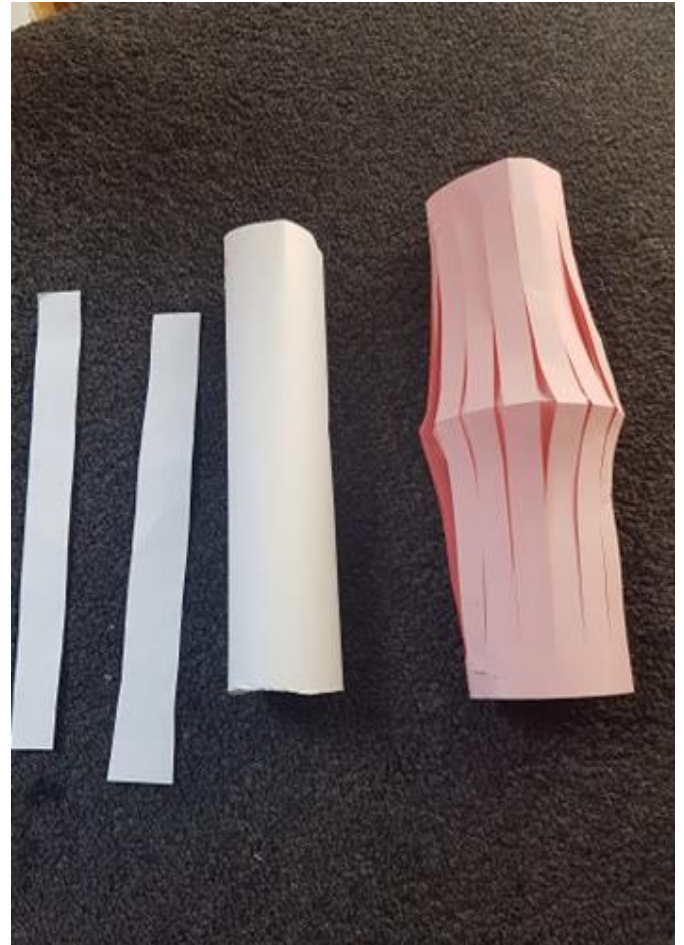

Step 2: With the folded paper, cut lines down the middle, but not all the way to the edge, leave roughly an inch on the end.

Step 3: Open up your A4 paper, and begin to roll it into a circle, gluing the end of your paper as shown, to hold it together.

Step 5: With the remaining A4 paper, roll up the paper using a glue stick to attach it together.

Step 6: Slot the rolled up paper inside the other piece of paper, to create the inside of the lantern.

Step 7: Finally, using the two strips cut off previously, wrap one around the top of the lantern and the other around the bottom, using your glue stick. You should then have your own paper lantern.
