

Handprint tree

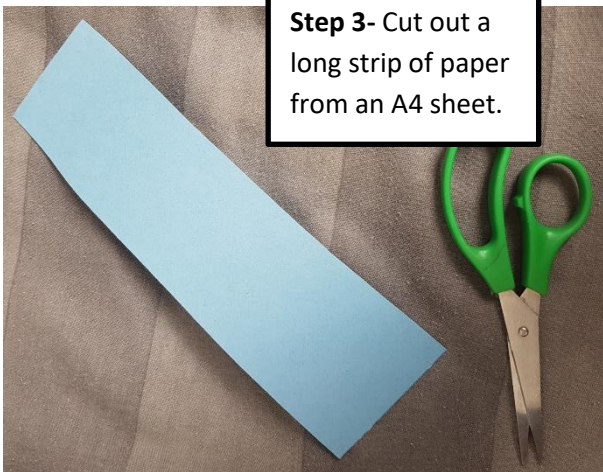

Step 1- Firstly, draw around your hand on an A4 piece of paper, and cut out your handprint.

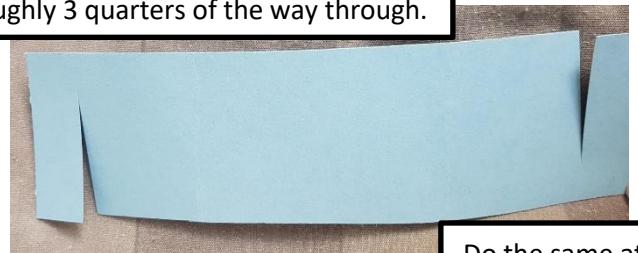

Step 2- Use different coloured paper to draw love hearts (or any other design) and then cut out each shape individually.

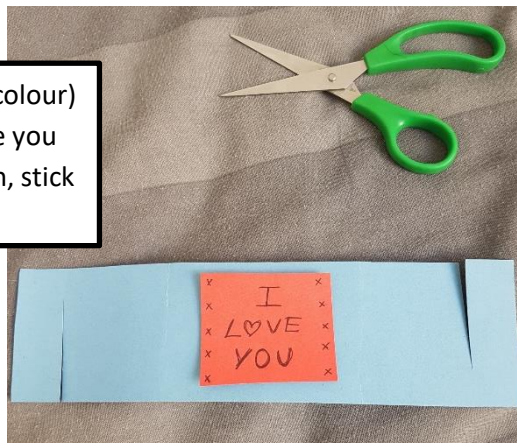

Step 3- Cut out a long strip of paper from an A4 sheet.

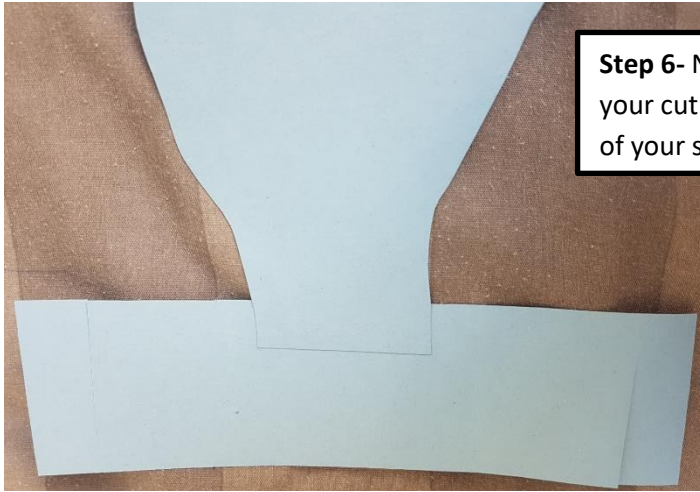

Step 4- Using the same strip of paper, cut a line, at one end of the strip, but not all the way to the end, only roughly 3 quarters of the way through.

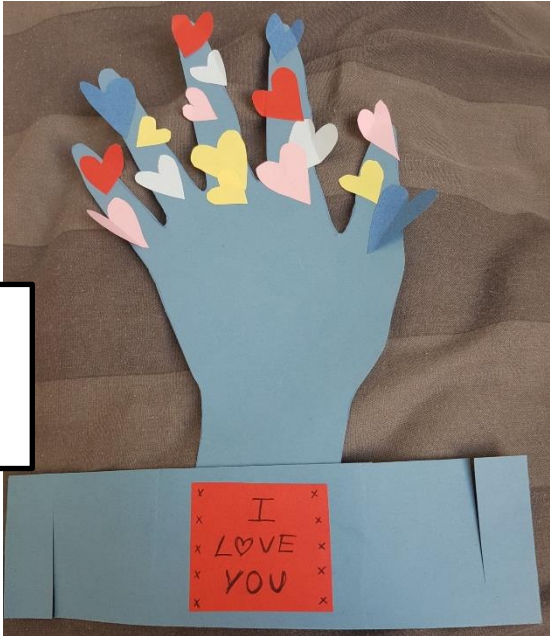

Step 5- Cut a square of paper, (in any colour) and write a message on it for someone you love. This can be anyone you like. Then, stick in on the middle of the strip of paper.

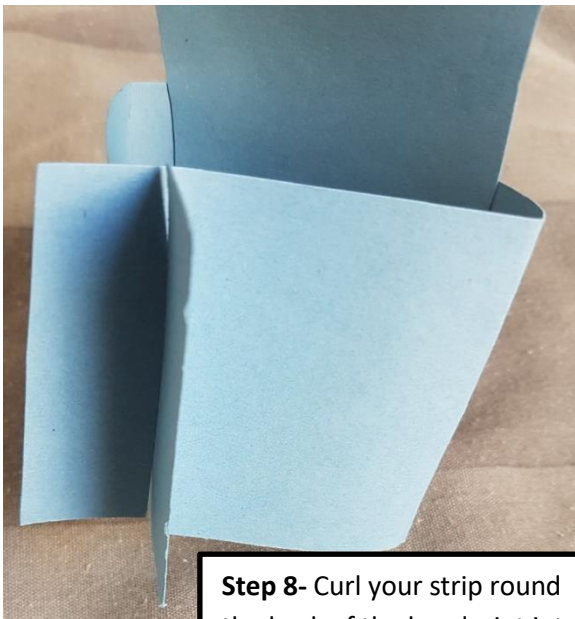

Do the same at the other end, however cut the strip at the opposite side to the other.

Step 6- Next, glue the front of your cut out handprint to the back of your strip of paper, as shown.

Step 7- Using your cut out love hearts (or shapes), glue them to your handprint on the fingers (or somewhere else if you'd prefer).

Step 8- Curl your strip round the back of the handprint into a circle, and using the cut out lines, attach the lines onto each other by sliding the strips into each other, like shown.

This should be your final piece. Now you can gift it to someone you love.
